FOX BLOCKS ANNOUNCES ADDITION OF 4" STRAIGHT, 90° CORNER AND 45° ANGLE BLOCKS TO ITS LINEUP

Fox Blocks, a division of Airlite Plastics Company, Omaha, NE., introduces three new 4" block shapes to its lineup in response to the industry's request for more options in above grade ICF wall systems.

The lineup consists of a 4" straight block, a 90° corner block and a 45° angle block.

The corner and angle blocks have an extended long leg, offering twice as much overlap as similar, wider core blocks.

These blocks feature the same 2 5/8" EPS panel thickness of the 6" and 8" blocks, the strong, bracket insert in the 90° corner block, and the same smart, durable design of the polypropylene ties of other Fox Blocks. With a 4" core to fill concrete in, the above grade only additions allow contractors and builders to save costs on the amount of reinforcing steel and concrete vs wider core blocks.

The name says it all. Like the fox, **Fox Blocks** is the design that outsmarts the others - clever, environmentally friendly, quick and adaptable to even the most extreme conditions.
