## **FOX BLOCKS RECEIVES ICC ES APPROVAL**

**Fox Blocks**, a division of Airlite Plastics Company, Omaha, NE., announces approval by the International Code Council (ICC) Evaluation Service with its ESR No. 2270. **Fox Blocks** are Insulating Concrete Form (ICF) Wall Systems used to build walls for residential and commercial structures.

After being available for purchase to builders and contractors nationwide for just 12 months, achieving ICC ES approval represents a major commitment by **Fox Blocks** to gain significant market share in the ICF business and in particular the commercial construction sector. Achieving the ICC Evaluation Service Report means that **Fox Blocks** are approved building products in most all areas of the United States. Building inspectors and code officials can feel confident that **Fox Blocks ICF's** are approved for use. The ICC ES Report No. 2270 will be available to view on the ICC and **Fox Blocks** web sites soon.

The name says it all. Like the fox, **Fox Blocks** is the design that outsmarts the others - clever, environmentally friendly, quick and adaptable to even the most extreme conditions.
